

We plant some trees

We have decided to balance our fleet's carbon footprint with the "I plant a tree" initiative. We have set ourselves a CO₂ limit of 120 g/km, and will make donations to the project based on the amount by which we exceed this. The sums we need to pay to balance the carbon footprint vary from vehicle to vehicle and also take into account the lease period and annual mileage.

The funds will be used to plant trees precisely where they are needed. With our 39 vehicles, we have planted almost 700 trees in the former mining area of Kobschütz to the south of Leipzig since 2015. According to "I plant a tree", these trees have absorbed 15 tonnes of CO₂ so far.

The project is very close to our hearts as it gives us the opportunity to balance out the impact of the CO₂ emissions our vehicles – which are unfortunately indispensable for us – produce, and improve the appearance and forestation levels in our local area. You can keep up to date with our statistics on our "I plant a tree" profile.
